

HP SLMS

The experts from HP Software Licensing & Management Solutions (SLMS) know all about the products of Red Hat, Inc. We identify the licensing agreement that meets your needs and work with the software publisher on your behalf.

MAXIMIZE YOUR INVESTMENT IN RED HAT PRODUCTS

Fans of Linux® and open source development appreciate Red Hat's highquality, low-cost technology. Red Hat employs the world's largest concentration of Linux talent. It provides operating system software, along with applications, management and middleware solutions. As a user of Red Hat products, your company makes a substantial investment in software. HP SLMS wants to help you realize the full value of that investment.

For more than 30 years, we've helped companies like yours maximize their software investments. HP SLMS assists you in acquiring, deploying and managing the right Red Hat solutions for your business. We find a licensing program that meets your needs, and make it easy to track renewals, comply with licensing requirements and manage your software.

WHY RED HAT?

Red Hat knows Linux and open source. It understands the performance, reliability, control and cost savings the technology delivers, and Red Hat uses that technology to build infrastructure for the enterprise. As a significant contributor to major open source projects including Linux, GNU and the Apache Web Server, Red Hat's breadth of expertise is hard to beat.

The open source development model fosters community-based collaboration—and that accelerates innovation. Anyone can improve the software, which means more choice for users.

RED HAT'S SUBSCRIPTION MODEL

Red Hat products are delivered as annual subscriptions.

SUBSCRIPTION BENEFITS INCLUDE:

- Fully inclusive price—for easy budgeting
- Stable, secure, no-risk deployment
- Automatic updates and patches
- Subscriptions that may be moved between systems, used to run any software version and apply to any supported architecture

GLOBAL SUPPORT SERVICES

- Thoroughly tested and quality-controlled technology
- Up to 24x7 with one-hour response and unlimited calls
- Expert Red Hat technical support with multiple service options
- Long-term support and maintenance (seven years) for each version with backports of security fixes

THE COMPUTER
IS PERSONAL
AGAIN.

**CERTIFICATIONS**

- Over 1,800 certified applications, over 1,100 certified hardware systems
- Access to all architectures, including Intel® x86, Intel Itanium®, Intel EM64T, IBM Power and IBM Z-series
- Defined platform certification and compatibility, defined hardware and software certification

RED HAT PRODUCTS**– RED HAT ENTERPRISE LINUX**

The premier operating system for open source computing runs on seven different architectures and is certified by top enterprise software and hardware vendors. Red Hat Enterprise Linux is backed by the Red Hat Enterprise support organization. It provides a complete family of client and server solutions for everything from laptop to mainframe.

– RED HAT NETWORK

A complete systems management platform for Linux that's built on open standards, Red Hat Network is scalable and easily integrates with existing systems and enterprise software. Administrators can add enhanced capabilities for system updates, management and monitoring of their entire computing infrastructure.

– RED HAT APPLICATION STACK

The first fully integrated open source stack, Red Hat Application Stack includes everything needed to run standards-based web and enterprise applications. It features Red Hat Enterprise Linux, JBoss Application Server with Tomcat, JBoss Hibernate and a choice of open source databases: MySQL® or PostgreSQL, and Apache Web Server.

– RED HAT GLOBAL FILE SYSTEM

The open source cluster file system is designed for high-performance enterprise workloads like Oracle® RAC and web/application server clusters. By providing a common, cluster-wide file system, you can manage a cluster of servers with shared storage as if it were a single system.

– RED HAT DESKTOP

This full-featured client system is suitable for use in a wide range of desktop deployments where security and manageability are critical. It features productivity tools like the OpenOffice.org suite, Mozilla web browsers, Pidgin instant messaging, Monotype® professional fonts and third-party applications by Adobe®, Java™, Citrix® and Real Player®.

– RED HAT GLOBAL PROFESSIONAL SERVICES

Red Hat offers a wide range of consulting and engineering services to make enterprise open source deployments successful—from complete Linux migration to client-directed engineering and custom software development.

– RED HAT GLOBAL LEARNING SERVICES

Red Hat's award-winning training courses and certification programs meet the diverse needs of Red Hat customers. The company has trained over 170,000 students from enterprise computing to architect level. It offers open enrollment, on-site courses and e-learning.

– JBOSS ENTERPRISE MIDDLEWARE SUITE (JEMS)

The market-leading open source middleware platform for service-oriented architecture, JEMS is a scalable suite of products for creating and deploying new applications. JEMS includes JBoss Application Server, Hibernate, JBoss Portal, JBoss jBPM, JBoss Cache, Apache Tomcat, JBoss Transactions, JBoss Rules and JBoss Messaging.

HP SLMS. THE RIGHT CHOICE

There are many reasons why customers choose HP SLMS for their Adobe software licensing needs, including:

- **EXPERIENCE:** SLMS has more than 30 years of experience in software licensing and management.
- **PARTNERSHIPS:** SLMS has strategic alliances with hundreds of leading software providers.
- **CUSTOMIZED APPROACH:** SLMS creates solutions based on your company's unique business needs.
- **SUPPORT & SERVICE:** SLMS provides outstanding after-sale support through our fully trained, dedicated global staff.
- **SINGLE-SOURCE ACCOUNTABILITY:** Consolidating where you buy hardware, software and services can improve your ROI.
- **STABILITY:** HP's FORTUNE 14 status gives you peace of mind, knowing we'll be there when you need us.

Discover a better way to license and manage all software across your enterprise.
