

HP Solutions for mySAP ERP implementations

A flexible, fast and cost-effective entry to mySAP ERP

For companies with a limited ERP infrastructure or none at all, mySAP ERP provides the ideal solution – a single integrated system for the central mapping, control and management of their data and processes. For companies that need help getting started, HP provides an easy and fast entry into mySAP ERP so you reap the benefits as quickly as possible.

A central point of control to drive growth and efficiency

mySAP ERP provides a single source of information from across the enterprise and automates processes that previously had to be performed manually or semi-manually. It makes businesses more efficient and helps them prepare for future growth.

mySAP ERP meets the requirements companies need to have an industry-leading, world-class ERP system. It integrates company-wide data into a single system to provide a central point of control over your business processes. It empowers management to make decisions based on complete, reliable, real-time information, improving their ability to respond in real time to changing business needs.

Complete IT solutions for greater business agility

To reap the full benefits of mySAP ERP, companies need a reliable and experienced expert to design and build a complementary underlying infrastructure. For SAP environments, HP offers world-class experience. For years, HP has closely collaborated with SAP to implement ERP systems for companies around the globe. HP offers flexible, scalable, and cost-effective solutions adapted to each customer's specific situation. Most importantly, our goal is to provide a quick and uncomplicated entry for you into the world of mySAP ERP.

Let HP help you capitalize on the benefits of mySAP ERP

Easy entry and scalable growth

HP offers you a fast and easy, yet highly scalable, entry into your mySAP ERP infrastructure. HP is a leader in products and services that increase the modularity of IT landscapes – a key requirement for agility. Together, our combined solutions scale dynamically to adapt to changing business and existing SAP installation needs.

Superior price-performance

HP ProLiant servers offer superior performance and scalability at a very affordable price to provide a reliable foundation for mySAP ERP. HP also offers a broad set of best-in-class storage solutions that deliver unmatched price-performance and are enhanced for rapid deployment and automated provisioning.

Low integration and operational cost

HP is an industry leader for cost-effective, standards-based IT system environments. As your system grows more complex over time, HP Blade servers enable better resource utilization, lowering operational costs. HP Integrity servers allow you to run Microsoft™ Windows, Linux or UNIX on the same hardware to protect your infrastructure investments. Pre-configured printer drivers easily transition your existing HP printer base into the new solution and extended input/output features allow you to quickly take full advantage of the functionality and performance of your new mySAP ERP solution.

Service levels matched to business needs

As a business-critical solution, the success of mySAP ERP depends on the availability and performance of the underlying IT infrastructure. HP Mission Critical Services help SAP customers proactively manage and evolve the mySAP ERP infrastructure to meet specific service level and cost management objectives.

Fast and easy deployment

HP's wealth of knowledge, experience, best practices and proven methodologies result in rapid implementation and availability of mySAP ERP. HP's sizing experts use sophisticated tools to assess the specific performance requirements of your installation. Simple, flexible, standardized and integrated infrastructure solutions and HP Rapid/IT services lead to reduced installation times and lower implementation costs. HP collaborates closely with SAP to deliver easy-to-deploy solutions. A set of SAP specific solutions and tools will quickly generate professional output from your mySAP ERP solution.

Flexible finance options

HP offers a broad range of flexible finance options to support a fast and cost-effective implementation.

Trust, reliability, competence

HP is the technology and industry leader on all major operating system platforms: Microsoft™ Windows, UNIX, and Linux. About half of all SAP installations worldwide run on HP. HP is also the market leader for printing devices and solutions in the SAP environment and has a global network of certified IT experts to provide local presence.

Tailored solutions

HP offers the industry's broadest portfolio of products and services for the design, implementation and operation of mySAP ERP and can provide single-vendor solutions for any customer scenario.

Together, SAP and HP offer end-to-end solutions to help enterprises of any size adapt to changing business needs and sharpen their competitive edge.
