

HP ePrint

Your smartphone just got smarter

We did it!

We just printed from a BlackBerry® smartphone. How easy was that? And that's the whole point: making mobile printing easier, so you can stay productive on the go.

For too long, mobile devices have kept us connected wherever we are, putting e-mail, Internet and the latest presentations and contracts at our fingertips—yet denying us the ability to print. Since the dawn of smartphones, printing has been the missing link in the mobile workflow.

But no more! Join the mobile revolution. With HP ePrint powered by HP CloudPrint Technology, printing becomes as mobile as your business demands.

What HP ePrint can do for you

Free your documents from mobile devices so you can print wherever business happens. Print from mobile devices without cables, Wi-Fi, printer drivers or special software.

- **The HP ePrint Enterprise solution** enables HP BlackBerry smartphone users to print to your company's secure network of printers. Travel to your company offices from New York to New Delhi and print from five minutes or 5,000 miles away.¹
- **HP ePrint locations** enable the same convenient printing on the go at HP ePrint-enabled locations—print and copy retail stores, hotels, airport lounges and more. Many HP ePrint locations are powered by PrinterOn®. With HP ePrint and the PrinterOn network of public printers—called PrintSpots™—you'll be able to print wherever life and business take you.²

Make printing as mobile as you are.

Visit www.hp.com/go/ePrintMobile for more information.

¹ HP ePrint Enterprise solution requires BlackBerry Enterprise Server deployment, Internet- and e-mail-capable BlackBerry smartphone OS 4.5 with separately purchased Wireless Internet service, HP ePrint app and HP ePrint server. Solution works with PCL5/6, PCL3, PCL3GUI printers (HP and non-HP)

² HP ePrint for public print locations requires Internet- and e-mail-capable BlackBerry smartphone OS 4.5 or newer with separately purchased wireless Internet service and HP ePrint app. Solution works with PCL5/6, PCL3, PCL3GUI printers (HP and non-HP)
