

HP solutions for the transition to mySAP ERP

Ensuring a smooth, fast and cost-effective transition

mySAP ERP, a next-generation ERP solution, adds new, enhanced functionality to give customers an even better understanding of their business. HP's specialized services ensure a smooth transition to mySAP ERP so you can take full advantage of it as quickly as possible.

The next-generation ERP solution

To increase productivity, efficiency, and competitive advantage for sustainable growth, companies around the globe are making the transition to mySAP ERP. For SAP customers, mySAP ERP is the next step in the evolution of their ERP system. Transitioning to mySAP ERP allows you to renew and optimize your IT infrastructure.

With our unmatched experience in the SAP environment, HP is the ideal partner to help you make that transition. We design and implement infrastructures that protect your investments in your SAP system landscape and realize the full benefits of mySAP ERP and SAP NetWeaver, SAP's open application and integration platform. We offer specialized services to ensure that the transition is smooth and cost-effective. And we help you manage your SAP environment more efficiently to reduce your total cost of ownership and react quickly and successfully to change.

Get more from your SAP solution with help from HP

Step-by-step, cost-effective approach

During the transition to mySAP ERP, HP uses an incremental, step-by-step, cost-effective approach that protects your existing IT investments and complements and leverages the benefits of mySAP ERP.

Transition the way you want it, how you want it

HP provides a complete, single-vendor solution, services and technology portfolio for the transition to mySAP ERP. A set of proven 360° assessment and design services such as the agility assessment, the HP SAP joint solution assessment, or the transaction volume measurement help determine the appropriate solution and upgrade design for your business. Based on this design, HP deployment services facilitate a smooth implementation using a tested step-by-step process. HP Mission Critical Services help SAP customers proactively manage and evolve their mySAP ERP infrastructure to meet specific service level and cost management objectives.

Cost-effective transition

HP offers flexible financing options, including loaner systems to avoid costly investments during the upgrade process. HP infrastructures are designed for equipment re-use, protecting your existing investments and delivering a fast ROI.

Industry-leading IT consolidation solutions

HP's industry-leading IT consolidation solutions for server, storage and database consolidation significantly cut the cost of operation and reduce IT system landscape complexity.

Lower total cost of ownership

Together, HP OpenView, the IT Service and Application Management initiative (IT S&AM), endorsed by SAP, and HP system management services enable efficient management of the SAP system landscape and help you better utilize SAP infrastructure assets. This ensures better operational control and efficiency and lower IT costs.

High performance, flexible, scalable solution

HP's server and storage solutions provide high performance at an affordable price. HP Integrity servers are built with operating system flexibility and

64-bit technology. Market-leading HP Blade servers are dynamically scalable to accommodate spikes in usage while hard and soft partitioning solutions give you flexibility. HP is a leader in products and services that increase the modularity of IT landscapes – a key prerequisite for high flexibility. Best-in-class SAP system administration processes and implementation tools specifically designed for SAP increase the capability to adapt to changes.

Professional input/output management

HP offers innovative solutions for enhanced electronic data capturing, forms automation and improved archiving, search and retrieval of data. These solutions support the mySAP ERP solution by streamlining the business workflows and enabling real-time access to all information in the company.

Integrated IT infrastructure

HP solutions, combined with HP Application Integration services for SAP environments, help customers build a completely integrated environment. The HP Real Time Supply Chain (RTSC) solution integrates pertinent data from disparate sources to provide a genuine real-time, consolidated business view.

HP solutions, services, and technologies help you get more from your SAP installation.

Together, SAP and HP offer end-to-end solutions to help enterprises of any size adapt to changing business needs and sharpen their competitive edge.
