

HP at Semicon West 2005

Experience. Insight. Innovation.

Assess for yourself why HP is the right company to provide you with fab automation solutions to meet your business and technology needs.

HP invites you to visit our technology and solutions booth at the Semicon West conference on July 11-15, 2005 at the Moscone Center in San Francisco, CA USA

HP Activities

Location Area and Topics

HP will be located in the South Hall and our focus this year will combine both front-end and back-end manufacturing in one concise and integrated view.

We'll be represented there by our semiconductor industry consultants and our high technology solution experts.

We'll be ready to talk to you on new subjects like improving financial and operational results through policy driven synchronization of the business and IT, and also be available to

discuss news and recent solution updates in areas like the latest in front end, assembly and test solutions.

Meeting and Solution Theater

- CIM solutions for 200mm and 300mm fabs, including HP's recent experiences as a prime contractor
- CIM solutions for semiconductor test and assembly areas
- New and exciting .Net based solution for equipment and application integration using open standards from Microsoft and off-the-shelf tools
- The latest technologies for RFID including solutions for enterprise collaboration
- Solutions for demand drive supply chain and visibility

Visit the HP Booth #240 and register to WIN an HP iPaq, HP iPod or an HP digital camera
