

Managed Deployment Asset Auditing

Refer to the Managed Deployment service description for more information

Service overview

Managing your IT computing assets throughout their lifecycle is essential for making informed technology-related business decisions, planning your overall capital expenditures and reducing costs. Asset Auditing provides you with a complete and up-to-date asset inventory of your entire multi-vendor IT environment to assist you in the strategic planning for technology purchases, leasing options, budgetary estimates and in the understanding of future technology roadmaps.

HP utilises auditing tools to discover, catalog and report on the assets in your IT environment, including software inventory and compliance reporting. This enables you to gain better control over your assets, maximise the return on your IT investment and provide a solid foundation for the provision of further managed deployment services across your enterprise.

Service benefits

This service offering will allow you to:

- Gain a thorough understanding of the IT assets present within your organisation.
- Conduct forward planning and budgetary roadmaps for technology refresh.
- Identify and accurately plan for the managed deployment of IT assets within your environment.
- Remain abreast of the current state of your IT assets to assist in the evaluation of corporate leasing and purchasing options.
- Generate accurate and informative management reports for analysis and review.

Service feature highlights

An experienced HP consultant will work with your organisation and will:

- Establish an understanding of your asset auditing requirements through consultation.
- Employ HP's proven Global Method project management methodology to manage the implementation of the Asset Auditing solution.
- Implement, monitor and manage the auditing of customer IT assets for the duration of the asset auditing service. This may include an optional physical on-site audit and labeling of IT assets.
- Provide automated and customised asset audit reports for complete and accurate accounting of your IT technology.

Customer profile

This service is suitable if your business wants to:

- Identify and catalog the IT assets present within your business.
- Identify factors for consideration when implementing a comprehensive managed deployment service within your business.
- Develop and maintain a technology lifecycle for driving further efficiencies in infrastructure optimisation and the lowering of costs.
- Drive maximum value from your technology base through accurate information reporting and improved financial management practices.

Service limitations

HP Asset Auditing service does not include:

- Design and implementation of an Asset Management solution.
- Consultation for financial asset management services. This is available through HP Financial Services.

Customer responsibility

To ensure the engagement is successful, HP requires you to:

- Have commitment from key stakeholders to participate in consultative workshops and interviews.
- Provide environment and system access for solution implementation.

Pricing

Pricing for the Asset Auditing service varies depending upon scale, complexity and the level of customisation required. The price will be finalised once the scope and deliverables are confirmed.
