Four Seater Model

HP Halo Collaboration Center: Best-in-class telepresence experience adds flexibility to support immersive collaboration for individuals and small teams

The Halo Collaboration Center brings the market-leading Halo experience to executives and small teams, addressing the diverse communications needs of your organization. The Collaboration Center features Two Seater or Four Seater models that have a small footprint and require minimal site preparation. The Collaboration Center can be placed in multiple locations including an executive's office or a conference room. Both models include Halo Multipoint collaboration with other locations worldwide, and both deliver the immersive, best-in-class telepresence experience for which Halo is famous.

Key benefits of the Collaboration Center include:

- Best-in-class telepresence for 1–4 people
- Halo Multipoint capabilities
- Dedicated collaboration channel
- Award-winning graphical user interface (GUI)
- Minimal site preparation time and cost

A Halo Collaboration Center offers all the benefits of Halo telepresence in a space that is optimal for an executive or small group. A Collaboration Center provides Halo's state-of-the-art environment, broadcast-quality camera and fully-duplexed audio to deliver a "same as being there" experience for private, one-on-one discussions or meetings between small teams.

Two Seater Model

The Halo difference—seamless communications that are natural and easy to use

Halo Collaboration Centers make the Halo experience more accessible for everyone. Imagine the convenience of walking into a Collaboration Center for a quick "face-to-face" update with a key executive or team working on a critical project. Halo's award-winning* GUI is so intuitive that no training is required. Halo's optimal video and audio performance assure consistent, natural and seamless communications between endpoints worldwide.

The Collaboration Center includes the HP Halo Telepresence Service, a comprehensive, global end-to-end managed service. As part of the service, customers benefit from bandwidth that is always available; reliable global connections; Concierge Support; automated monitoring of network health, devices and software; proactive checks of camera alignment and lighting; and fast repair/response. The Halo Telepresence Service also includes Halo's Technology Refresh, which ensures that all components critical to maintaining the Halo experience the customer purchased remain current and that all Halo endpoints remain compatible.** All of this means your company does not need to invest in network upgrades or additional support staff. Halo's Telepresence Service enables you to collaborate more effectively, globally, to give you an edge on the competition now.

The HP Halo Collaboration Center—Standard Features and Services

- **Exceptional design and components:** Halo takes telepresence into a new dimension with state-of-the-art design and precision components, including fully-duplexed spatial audio with echo cancellation, broadcast-quality cameras and optics, and executive furnishings that are included with both models.
- **Halo Multipoint capabilities:** Halo allows users to connect to multiple locations around the world at the same time.
- **Dedicated collaboration channel:** Halo's proprietary HD collaboration channel is a standard component of the Collaboration Center. The Halo collaboration channel supports high frame rates, allowing participants to easily share any content from their laptop computers, including full-motion video, with colleagues around the world.
- **Immersive industrial design:** The Collaboration Center includes a specially designed front wall that minimizes distractions to the eye, while optimizing video presentation and the overall collaboration experience.
- **Award-winning ease of use:** Halo's award-winning GUI is widely regarded as the best in the industry for its ease of use. With Halo's acclaimed and intuitive GUI, even new users can connect to multiple locations worldwide with just a few clicks of a mouse.
- **Technology Refresh:** As part of the Halo managed service, HP routinely makes available new features and technologies as they are developed—to keep current all components critical to maintaining the Halo experience the customer purchased.** Features already provided to new and existing Halo customers at no additional charge include AES-256 encryption and 15 different language options for Halo's GUI.
- **HP on-site installation:** HP's team works with customers to ensure a remarkable collaborative experience, from site selection to final delivery of a ready-to-use Collaboration Center.

Optional Features

- **High-Definition, Overhead Object Camera:** This camera allows users to share hard copy documents or handheld objects critical to collaboration and decision-making. The high-definition, overhead object camera is capable of displaying 1280x960 or 720 HD, with a max zoom of 64x.
- **Halo Collaboration Center Back Wall:** This custom-designed, freestanding curved wall utilizes acoustic fabric to provide a more consistent telepresence experience, improve overall sound quality and create a more private meeting space.
- **Halo Collaboration Center Lighting Package:** Utilize HP's expertise and assure that your space provides optimal lighting by adding an overhead lighting package with remote calibration capabilities. HP's lighting kit includes a front bank of lights and three backwash lights.
