

HP's is hosting a Free, 1-hour seminar on HP's High Performance Computing.

Find out how this exciting new technology can help you improve performance and efficiency

**Seminar Dates/Time:**

Monday, March 2nd  
and  
Tuesday, April 7th

12:00pm-1:00pm  
Eastern US Time Zone

**Introduction to HP's High Performance Computing and Cluster Solutions**

This session is focused on High Performance Computing (HPC), a key segment of the Scalable Computing and Infrastructure (SCI) market and cluster solutions from HP. From this session, users will walk away with a clear understanding of the meaning of HPC, key market trends, and learn about HP's Unified Cluster Portfolio (UCP) -- ideal for customers recognizing the importance of High Performance Computing for sustained competitiveness.

The modular design and packaging of our Cluster Platforms allows customers to smoothly deploy over multiple phases, providing investment protection, as well as, easy integration of new server and interconnect technologies over time. HP's UCP software simplifies management, reducing the burden on IT staffs, while incorporating best practices for achieving scalable performance and efficiency.

Topics covered in this Short Take seminar include:

- What is High Performance Computing?
- Key Market Trends
- HP in the HPC Market
- HP Unified Cluster Portfolio
  - Computation
  - Data Management
  - Visualization
  - Cluster Platform Express

This session is intended for IT management and systems administrators
